AHMED OTHMAN

MAINTENANCE MANAGER & INDUSTRIAL AUTOMATION

ahmed.othman.oa@gmail.com , +21699987391 , Tunis, Tunisia

SUMMARY

Maintenance manager with 5 years of experience in the cement industry. Leads a 40-technician maintenance team plus contractors, with a TND 20 M maintenance and CAPEX budget. Proven record in maintenance strategy and planning, failure analysis (8D, RCA, PDCA), KPI monitoring, spare-parts and cost management, and CAPEX projects from specification to commissioning. Raised equipment availability from 70% to 96%. Fluent in English and French (C1).

EXPERIENCE

Maintenance Manager

03/2025 - Present

SINOMA Cement Co., Ltd — **Tunis, Tunisia**

- Head the plant's maintenance department: 40 technicians plus contractors for CAPEX and shutdown work. Define maintenance strategy and set work priorities.
- Own the maintenance budget and CAPEX plan (TND 20 M): forecasting, cost control and replacement of obsolete equipment.
- Raised equipment availability from 70% to 96% and improved MTBF by 15% through structured failure analysis and continuous improvement (8D, RCA, PDCA). Raised cement mill reliability from 70% to 96% by replacing obsolete installations.
- Manage the maintenance programs: maintenance and replacement strategy, plant condition assessment, preventive and corrective plans, KPI monitoring (availability, MTBF, downtime), spare-parts and warehouse management, and failure analysis.
- Advise the Plant Manager through weekly technical reporting, KPI reviews, new-installation studies (10 MWac PV feasibility study, alternative-fuel impact on induced-draft fan power) and the 5-year Plant Development Plan.
- Project Lead, 5000 kVA MV transformer commissioning (07/2026): civil works, factory test validation, protection relay configuration and testing, Tunisian regulatory compliance.
- Defined SOPs for critical tasks to improve safety and repeatability, and set up a communication framework with production and quality.

Industrial Automation Engineer

02/2022 - 03/2025

Votorantim Cimentos — **Tunis, Tunisia**

- Stepped in as Electrical Maintenance Manager at very short notice, leading a team of 18 and ensuring continuity of maintenance operations for one year.
- Maintained and continuously improved the plant process control system (PCS7, 14 S7-400 stations, 60 control cabinets);monitored electrical energy and ensured regulatory compliance.
- Led full PCS7 system audits, identifying reliability improvements.
- Implemented a spare-parts strategy achieving 100% equipment availability and cutting the maintenance budget by 5% (1.2M TND).
- Used PRONETA and nmap in industrial network testing campaigns, sustaining near-100% network availability.

PROJECTS

Commissioning of 5000 kVA Medium-Voltage Transformer

06/2026

Project Lead

- Prepared civil works and mechanical support structure; followed manufacturing and validated factory tests.
- Configured new protection relays and tested all transformer and line protections; ensured compliance with Tunisian law.

New Limestone Crusher Commissioning
12/2023

Engineer

- Programmed the crushing process and automation logic in PCS7; developed and validated electrical and processinterlocks per P&ID diagrams.
- Performed FAT/SAT testing and supported maintenance teams through handover, safeguarding equipment integrity andproduction continuity.

ABB LIMS Integration with DCS
12/2022

Engineer

- Integrated the ABB Laboratory Information Management System (LIMS) with the DCS for real-time quality data; configuredcommunication interfaces and validated end-to-end data flows.
- Improved process control and operational decision-making through better data visibility.

ABB Ability Expert Optimizer for Cement
11/2022

Engineer

- Developed switching logic, control loops and process-optimization strategies; simulated and validated operating scenariosbefore on-site commissioning.
- Coordinated with process, automation and maintenance teams for seamless DCS integration.

EDUCATION

École Nationale d'Ingénieurs de Sousse (ENISo)
09/2017 - 09/2021

Engineering Degree (Diplôme d'Ingénieur) in Mechatronics

SKILLS

Maintenance Management

- Maintenance strategy and planning (preventive, corrective, condition-based), maintenance KPIs(availability, MTBF, MTTR, downtime)Maintenance budgeting and cost control, spare-parts and inventory management,failure analysis (RCA, 8D, PDCA, FMEA), CAPEX planning and execution, supplier and contractor management, Health & Safety work procedures (LOTO), operational excellence and continuous improvement.

Leadership

- Team leadership (40 technicians), team building, technical reporting to plant management, cross-functionalcoordination with production, process and quality.

Electrical

- HV/MV/LV distribution, MV transformers, protection relays and protection testing, variable frequency drives,medium voltage motors

Automation

- STEP 7, TIA Portal V20, PCS7 V9, CFC, SFC, WinCC Advanced V6, OPC DA, OPC UA, Profibus, Profinet,EtherNet/IP, PRONETA

Languages

- English (C1), French (C1), German (A1)

Certifications

- PMP, Cisco Certified Network Associate (CCNA), ABB Ability Expert Optimizer, React & Node.js, TOEIC(940)
